

Ability Dogs Canada

WHO WE ARE

Ability Dogs Canada strives to unite dogs and people to balance abilities for all and provide opportunities to each dog's handler. We offer a variety of programs to educate, enable, and empower individuals and organizations.

WHO WE HELP

We offer fully trained service dogs for individuals who struggle from medical challenges that restrict their independence. Adult or child, our service dogs are trained to meet your individual needs, including, but not limited to autism seizure alert/response, PTSD, a variety of mental health challenges, and mobility support.

LEARNING MORE

Training a service dog is a substantial time and financial investment. Our fee structure is broken down into multiple segments spread out over time and we are happy to support a candidate's fundraising efforts when possible. Current wait times for a trained service dog range from several months to a few years depending on the dog and needs of the handler. We would be happy to speak more with you about details if you are interested!

PARTNERING WITH US

There are many ways to be involved in the ADC community! Not only do we work to train service puppies in training, but we also offer the option for you train your own dog. We are also always looking for foster families to raise and train puppies as well as occasional puppy-sitters!

CONTACTING US

Follow on our journey and contact us to learn more! Details below.
